## **RESTRICTION**

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 201-234 and 236-238, drawn to a filter circuit, classified in class 327,

subclass 552.

II. Claim 235, drawn to an amplifier circuit, classified in Class 327, subclass 560.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different Inventions I and II are unrelated because the Invention I recites the filter circuit and the Invention II addresses the amplifier circuit which operates in different mode from the Invention I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DINH T. LE whose telephone number is (571) 272-1745. The examiner can normally be reached on Monday-Friday (8AM-7PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Drew Richards, can be reached at (571) 272-1736.
